The screenshot shows the Looka website's 'Free Logo Maker' interface. At the top, there is a navigation bar with the Looka logo on the left and links for 'Logo Maker', 'Brand Kit', 'How It Works', 'Reviews', 'Logo Ideas', and 'Blog' in the center. On the right side of the navigation bar are 'Log in' and 'Sign up' buttons. The main content area features the heading 'Free Logo Maker' in a large, bold font. Below the heading is a subheading: 'Looka Logo Maker combines your logo design preferences with Artificial Intelligence to help you create a custom logo you'll love. All it takes is a few clicks and five minutes.' Underneath this text is a light gray input field with the placeholder text 'Enter your company name' and a blue button labeled 'Let's make a logo!'. At the bottom of the interface, there are two preview cards: a dark blue one with a white checkmark and a purple one with a yellow logo. There are also two circular icons at the bottom corners: a question mark icon on the left and a chat bubble icon on the right.

Text2Video: Microsoft Talking Faces

Source: <https://www.microsoft.com/en-us/research/project/vasa-1/>

Wegen des enormen Missbrauchspotenzials für täuschend echte Deepfakes hat Microsoft entschieden, **VASA-1 nicht als öffentliches Tool oder API bereitzustellen**. Es handelt sich um ein reines Forschungsprojekt. Microsoft betont, die Technologie erst dann kommerziell oder öffentlich zugänglich zu machen, wenn sichergestellt ist, dass sie verantwortungsvoll und im Einklang mit ethischen Richtlinien genutzt wird.

A baby CEO wearing sunglasses and a navy suit dominates the office dance floor. He confidently points at the camera, fixes his tie, and suddenly begins performing world-class breakdance moves. Fast footwork, windmills, backspins, head spins, freezes, and power moves. Employees gather around, cheering and celebrating as if they are watching a championship competition. The camera follows the baby with dynamic tracking shots, cinematic zoom-ins, dramatic slow motion, realistic body movement, natural suit physics, funny yet impressive. Ultra realistic, photorealistic, viral TikTok style, 4K, masterpiece quality. ^

Google Gemini: Video Transcription

Gemini kann Videos ansehen und daraus Wissen extrahieren.

please watch the video <https://youtu.be/IXdbLJD3sZM> and tell me key findings in bullet points

◆ YouTube ▾

The video, "Model Benchmark (101)," discusses key frameworks for comparing the performance of large language models (LLMs).

Here are the key findings presented:

- **Primary Benchmarking Framework:** The most prominent framework for checking model performance is **LM Arena** (lmarina.ai), which offers an updated leaderboard of models [00:23], [00:36].
- **Performance Ranking:** At the time of the video's recording, **Gemini 2.5 Pro** was in the leading position, followed by a model from OpenAI [00:46].
- **Specific Capabilities:** LM Arena allows filtering results by specific categories, such as **mathematical capabilities**, to see how model rankings might shift for different focus areas [01:12].
- **Alternative Benchmarks:** Other leaderboards exist, including one focused on models proficient in **European languages** [01:49] and a graphical leaderboard provided by **Vellum AI** [02:07].
- **Vellum AI Focus Areas:** The Vellum AI leaderboard provides scores for difficult datasets on areas like **reasoning**, **mathematical problems**, **agentic coding**, and **tool use** [02:25].

Schlagzeile 2024:

Der Song „Verknallt in einen Talahon“ ist im Moment dabei deutsche Musikgeschichte zu schreiben. Er ist nämlich der erste durch KI-produzierte Song, der sich in den deutschen Charts platzieren konnte. Momentan befindet er sich auf Platz 48. Geschrieben wurde der Retro-Schlager-Track vom deutschen Produzenten Butterbro, der mit Hilfe eines KI-Programms die Stimme und Musik des Songs generierte.
