Installation und erste Schritte

Gemini CLI

Installation und erste Schritte

➤ `npm install -g @google/gemini-cli`

➤ `gemini`

```

  GEMINI

Gemini 3 Flash and Pro are now available.
Enable "Preview features" in /settings.
Learn more at https://goo.gle/enable-preview-features

Tips for getting started:
1. Ask questions, edit files, or run commands.
2. Be specific for the best results.
3. /help for more information.

Gemini CLI update available! 0.21.2 → 0.26.0
Installed with npm. Attempting to automatically update now...

Using: 1 GEMINI.md file
```

Gemini CLI

Installation und erste Schritte

➤ /model

```
> /model
```

Select Model

Gemini 3 is now available.

Enable "Preview features" in /settings.

Learn more at <https://goo.gle/enable-preview-features>

- 1. Auto (Gemini 2.5)

Let Gemini CLI decide the best model for the task: gemini-2.5-pro, gemini-2.5-flash

- 2. Manual

Manually select a model

To use a specific Gemini model on startup, use the --model flag.

(Press Esc to close)

Gemini CLI

Installation und erste Schritte

```
> /help
```

Basics:

Add context: Use `@` to specify files for context (e.g., `@src/myFile.ts`) to target specific files or folders.

Shell mode: Execute shell commands via `!` (e.g., `!npm run start`) or use natural language (e.g. `start server`).

Commands:

`/about` - Show version info

`/auth` - Change the auth method

`/bug` - Submit a bug report

`/chat` - Manage conversation history

`list` - List saved conversation checkpoints

`save` - Save the current conversation as a checkpoint. Usage: `/chat save <tag>`

`resume` - Resume a conversation from a checkpoint. Usage: `/chat resume <tag>`

`delete` - Delete a conversation checkpoint. Usage: `/chat delete <tag>`

`share` - Share the current conversation to a markdown or json file. Usage: `/chat share <file>`

`/clear` - Clear the screen and conversation history

`/compress` - Compresses the context by replacing it with a summary

`/copy` - Copy the last result or code snippet to clipboard

`/docs` - Open full Gemini CLI documentation in your browser

`/directory` - Manage workspace directories

`add` - Add directories to the workspace. Use comma to separate multiple paths

`show` - Show all directories in the workspace

`/editor` - Set external editor preference

`/extensions` - Manage extensions

`list` - List active extensions

`update` - Update extensions. Usage: `update <extension-names>|--all`

`explore` - Open extensions page in your browser

`restart` - Restart all extensions

`/help` - For help on gemini-cli

`/ide` - Manage IDE integration
