Chat - Model Family

Haiku

- Fastest model
- Less intelligent
- 1 \$ / 5\$ (per Million tokens)
- 200k context window

Sonnet

- smart model
- For complex agents and coding
- 3 \$ / 15\$ (per Million tokens)
- 200k context window

Opus

- Slowest model
- smartest model
- Maximum intelligence
- 5 \$ / 25\$ (per Million tokens)
- 200k context window
- Only for Pro subscribers

Claude

Chat - Thinking

- Extended thinking available in all modes
- Works slower, but provides better responses for complex tasks
- Shows exactly how it thinks so that the user can understand why a result came up

gollnickdata.de

I need to schedule a 30-minute meeting with four busy executives: Alice, Bob, Charlie, and Diana.

- Alice is free only from 9:00 AM to 11:00 AM.
 - Bob is busy from 9:30 AM to 10:30 AM but free otherwise.
 - Charlie can't meet before 10:00 AM.
 - Diana is available only when Bob is available, but she has a hard stop at 10:45 AM.
-
1. Analyze the constraints for each person.
 2. Identify the specific 30-minute window where everyone can meet.
 3. Show your step-by-step reasoning to prove why other times don't work.

gollnickdata.de

vergleiche die Empfehlungen aus Paper A und B. Wo unterscheiden sie sich?

erstelle eine Tabelle in der beiden Methoden verglichen werden.

Aspekt	Paper A: The Ethics of Generative AI in Academia	Paper B: Productivity Gains via LLMs in Research
Methodentyp	Qualitativ	Quantitativ
Datenerhebung	Umfragen (Surveys)	Zeiterfassung (Time-tracking)
Stichprobe	10 Universitäten	500 Doktoranden
Fokus	Einstellungen, Bedenken, ethische Aspekte	Messbare Effizienzgewinne, Datenqualität
Zielsetzung	Erfassung von Nutzungsverhalten und Sorgen	Quantifizierung von Produktivitätssteigerungen
Stärken	Tiefere Einblicke in Motivationen und Bedenken	Präzise, messbare Ergebnisse; große Stichprobe
Einschränkungen	Schwerer zu generalisieren; kleinere Reichweite	Erfasst keine qualitativen Aspekte wie Bedenken
Ergebnisart	Prozentsätze aus subjektiven Einschätzungen	Konkrete Zeitersparnis und Genauigkeitswerte

Live Demo

Create a project

- a) That helps with your job or field (marketing guidelines, industry regulations)
- b) For fictional writing: you develop a world (characters, plot outlines, worldbuilding notes)

Write custom instructions

- Ask at least 3 different questions that require Claude to use your project knowledge
- Ask one question that goes beyond your uploaded knowledge to see how Claude handles it

Reflect

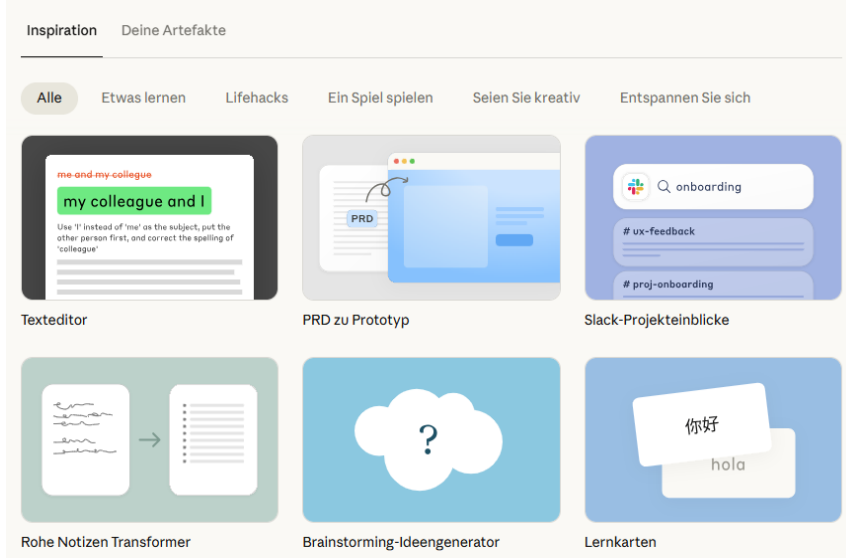

- what worked well,
- what you need to change,
- when you use this project vs. a regular chat

Artifacts

Claude

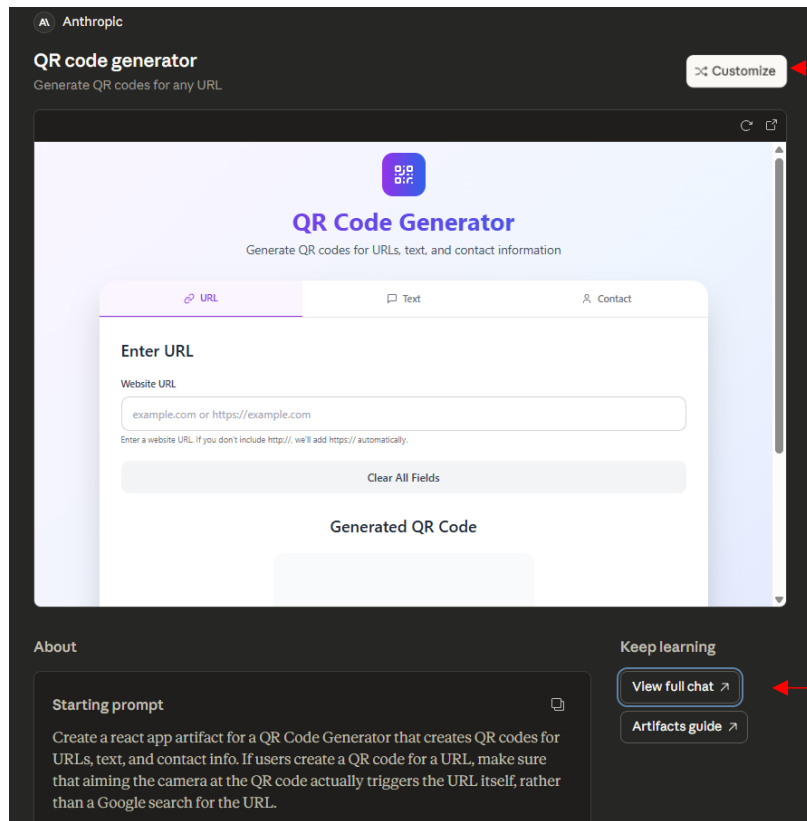

Artifacts

- standalone windows for viewing and interacting with complex content.
- **Side-by-Side View:** Opens code, docs, or websites in a separate pane next to the chat.
- **Live Previews:** Renders code (React, HTML, Mermaid diagrams) into interactive visuals instantly.
- **Version Control:** Tracks changes so you can toggle between earlier and later drafts.
- **Purpose:** Best for content you need to edit, iterate on, or export (like a script or a dashboard).
- **Sharing:** Allows you to publish and share the output as a standalone link.

Powerpoint
Presentations

Interactive
Learning

Competitor
Analysis

- Create an interactive **Grade Calculator** app.
- It should allow me to input
 - assignment names,
 - weights,
 - and scores,
- then visualize the final grade with a progress bar and a pie chart.

Gewichtungsübersicht

Klausur 1: 20%

Klausur 2: 10%

Interactive Dashboard

- Ask Claude for a list of planets of our solar system, including their distance from sun, surface temperature, mass, ...

Create an interactive dashboard that visualizes this planetary data using a bar chart and a sortable table.

- Observe how the preview window allows you to interact with the UI instantly

Technical Documentation

- Ask Claude to draft a User Manual for a hypothetical time-travel app

Write a technical manual for a time-travel device including a Table of Contents, Safety Warnings, and Troubleshooting steps as a markdown Artifact.

- Learn how Artifacts manage long-form content separately from the chat

Claude Skills

Claude Skills

Extending AI Capabilities with Custom Knowledge

Claude

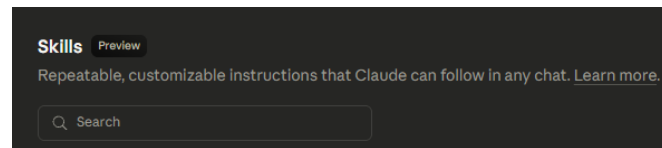

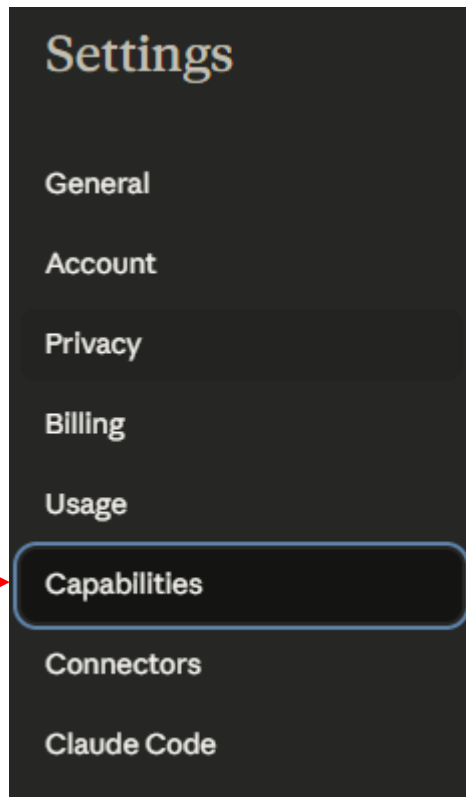

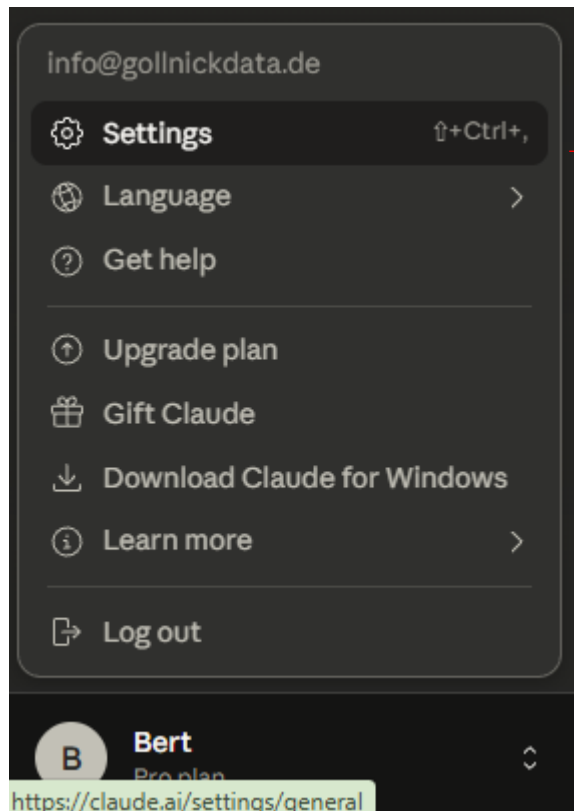

Skills vs. Projects

Aspect	Claude Projects	Claude Skills
Purpose	Organize conversations and share context across chats	Extend Claude's capabilities with specialized knowledge for specific tasks
What they contain	Conversations, uploaded files, custom instructions, project knowledge	Step-by-step workflows, best practices, domain expertise (stored in SKILL.md files)
Scope	Workspace for related conversations and materials	Functional capability or expertise area
Memory	Each project has its own separate memory space	Skills don't have memory - they're reference documentation
How Claude uses them	Automatically accesses project context in conversations within that project	Reads skill files when relevant tasks are requested (like creating a presentation)
Customization	You define project instructions and upload project-specific documents	You can create custom skills with specialized workflows
Examples	"Marketing Campaign 2024" project with all related chats and assets	docx skill (Word documents), pptx skill (presentations), frontend-design skill
When it's active	Only when you're inside that specific project	Triggered automatically when task matches the skill's domain
Relationship	Projects can contain and use skills	Skills exist independently and can be used across different projects

Create shortcut

×

Name

/ setup-miro-board

Prompt

Navigate to the Miro board at
https://miro.com/app/board/uXjVGLTxSs=.

Create three sticky notes on the canvas and label them with the three provided categories. Arrange them in a horizontal layout with the first sticky note positioned in the upper-left area of the canvas, the second sticky note in the middle-left area below it, and the third sticky note positioned to the right of the second note.

biological taxonomy

Claude's plan

Allow actions on these sites

- miro.com

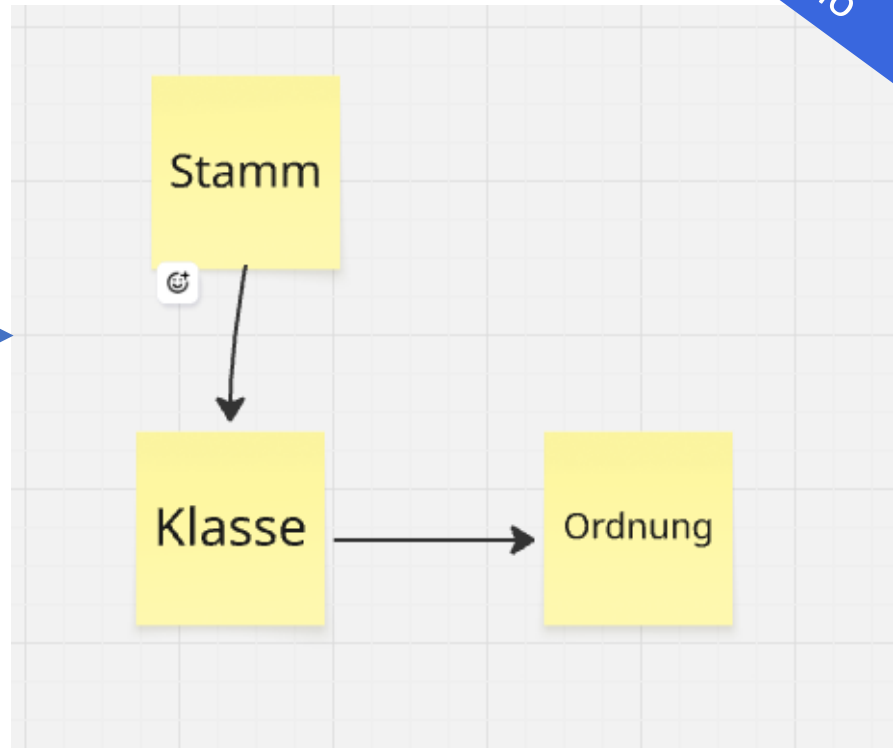

Approach to follow

- 1 Navigate to the Miro board (already open in tab)
- 2 Take a screenshot to see the current state of the board
- 3 Create the first sticky note in the upper-left area
- 4 Create the second sticky note in the middle-left area below the first
- 5 Create the third sticky note to the right of the second note
- 6 Label each sticky note with appropriate

Approve plan

Make changes Ctrl + ↻

Claude will only use the sites listed. You'll be asked before accessing anything else.

Pro Feature

Claude

Browser – Create and Download Images

1. Navigate to local folder

2. Run „claude --chrome“

3. Prompt it
